**STAR - ORION SOUTH DIAMOND PROJECT  
MEMORANDUM OF UNDERSTANDING SIGNED WITH JAMES SMITH CREE NATION**

George Read, Senior Vice President Exploration and Development of Shore Gold Inc. ("Shore" or the "Company"), is pleased to announce that a Memorandum of Understanding ("MOU") has been signed by the Company and James Smith First Nation, Peter Chapman Cree Nation and Chakastaypasin Cree Nation, collectively referred to as the James Smith Cree Nation ("JSCN"). The terms of the MOU provide that the parties will engage in discussions concerning potential education and training, job, business and participation opportunities for members of JSCN. These discussions aim to establish mutually agreeable terms for a participation agreement in anticipation of the proposed Star - Orion South Diamond Project ("the Project"). The Project is located in the Fort à la Corne forest, which is used by JSCN for traditional activities. JSCN reserve lands are located immediately to the south of the Project area.

The Project is located in central Saskatchewan some 60 kilometres east of the city of Prince Albert. The Project is in close proximity to established infrastructure, including paved highways and the electrical power grid, which provide significant advantages for future mine development. The NI 43-101 compliant Technical Report on the Feasibility Study and Updated Mineral Reserve for the Star - Orion South Diamond Project dated July 14, 2011 provided an updated Mineral Reserve Estimate for the Star and Orion South kimberlite deposits: Probable Mineral Reserves of 279 million tonnes containing 34.4 million carats of diamonds at a weighted average price of US\$242 per carat, that can be profitably mined over 20 years. In addition to the Mineral Reserve Estimate, the Star and Orion South Kimberlites have been estimated to include Inferred Resources containing 15.7 million carats.

In March 2014 an estimate was made of the Target for Further Exploration ("TFFE", formerly known as "Potential Mineral Deposit") for five partially evaluated kimberlites and the portions of the Star and Orion South Kimberlites, which fall outside the Indicated and Inferred Resources previously estimated (see SGF News Release July 14, 2011). The TFFE for these seven Fort à la Corne Kimberlites is estimated to include between 983 million and 1.17 billion tonnes of kimberlite containing between 52 and 90 million carats of diamonds. The TFFE is conceptual in nature and is not a Mineral Resource and it is uncertain whether further exploration work will result in the TFFE being delineated as a Mineral Resource.

Shore is a Canadian based corporation engaged in the acquisition, exploration and development of mineral properties. Shares of the Company trade on the TSX Exchange under the trading symbol "SGF".

**Caution Regarding Forward-Looking Statements**

This news release contains forward-looking statements as defined by certain securities laws, including the "safe harbour" provisions of Canadian securities legislation and the United States Private Securities Litigation Reform Act of 1995. Forward-looking information is often, but not always, identified by the use of words such as "anticipate", "believe", "expect", "plan", "intend", "forecast", "target", "project", "guidance", "may", "will", "should", "could", "estimate", "predict" or similar words suggesting future outcomes or language suggesting an outlook. In particular, statements regarding Shore's future operations, future exploration and development activities or other development plans constitute forward-looking statements. By their nature, statements referring to mineral reserves, mineral resources or TFFE constitute forward-looking statements.

Forward-looking statements in this press release include, but are not limited to TFFE; the range of quantity, range of grade and range of carats for the TFFE; mineral resource estimate for the Star and Orion South kimberlite deposits; inferred resources for the Star and Orion South kimberlite deposits; range of tons of kimberlites not included in the TFFE; the aim of Shore to undertake additional microdiamond studies and the potential upgrading of inferred to indicated resources.

These forward-looking statements are based on Shore's current beliefs as well as assumptions made by and information currently available to it and involve inherent risks and uncertainties, both general and specific.

Risks exist that forward-looking statements will not be achieved due to a number of factors including, but not limited to, developments in world diamond markets, changes in diamond prices, risks relating to fluctuations in the Canadian dollar and other currencies relative to the US dollar, changes in exploration, development or mining plans due to exploration results and changing budget priorities of Shore or its joint venture partners, the effects of competition in the markets in which Shore operates, the impact of changes in the laws and regulations regulating mining exploration, development, closure, judicial or regulatory judgments and legal proceedings, operational and infrastructure risks and the additional risks described in Shore's most recently filed Annual Information Form, annual and interim MD&A. Shore's anticipation of and success in managing the foregoing risks could cause actual results to differ materially from what is anticipated in such forward-looking statements.

Although management considers the assumptions contained in forward-looking statements to be reasonable based on information currently available to it, those assumptions may prove to be incorrect. When making decisions with respect to Shore, investors and others should not place undue reliance on these statements and should carefully consider the foregoing factors and other uncertainties and potential events. Unless required by applicable securities law, Shore does not undertake to update any forward-looking statement that is made herein.
