Hello,

July was a spectacular month for Star Diamond Corp., as we saw a dramatic increase in the estimated Mineral Resources for the Star - Orion South Diamond Project. Here are some key highlights:

- **Indicated Mineral Resources on Star have increased 22 percent** to 34.8 million carats and the grade has increased 20 percent to 19.4 cph
- **Indicated Mineral Resources on Orion South have increased 37 percent** to 36.9 million carats and the grade has increased 32 percent to 17.9 cph
- **Star Diamond has determined that no additional bulk sampling is required on the Orion South Kimberlite** for the rigorous estimation of these Mineral Resources, and this results in the savings of millions of dollars in exploration expenditures and shaves significant time off the completion of the PreFeasibility Study.

We encourage you to read the full press release [here](#).

Additionally, CEO Ewan Mason and Senior VP of Corporate Development George Read shared their insights on the updated Mineral Resource Estimate and addressed many of your questions during the live Q&A session.

Thank you.
